

Special Issue on

New Advances in Rheological Rock under Extreme Geological Environments: from Experiments to Applications

Call For Papers

A new Special Issue *New Advances in Rheological Rock under Extreme Geological Environments: from Experiments to Applications* (<http://www.esjournal.org/sinfo/161021>) has been launched in *Earth Sciences* (<http://www.esjournal.org>). This Special Issue intends to collect research achievements concerning new advances in rheological rock under extreme geological environments. Novel insights as well as fundamental research on the topics are warmly welcomed. Your submissions along with your ingenious works are expected.

Lead Guest Editor

Lead Guest Editor: Shuai Li

Affiliation: 1. Center for Rock Instability and Seismicity Research, Department of Mining Engineering, School of Resource and Civil Engineering, Northeastern University, Shenyang, Liaoning, China

2. School of Civil and Transportation Engineering, Henan University of Urban Construction, Pingdingshan, Henan, China

Paper Submission

Potential authors are humbly requested to submit an electronic copy of their complete manuscript via <http://www.esjournal.org/submission>

Topics of Interest Include (but not limited to):

- ◆ Failure mechanism related to accelerating creep of rock triggered by dynamic disturbance
- ◆ Development of rheological fracture under dynamic disturbance conditions such as earthquakes
- ◆ Rock stress relaxation disturbed by dynamic loading
- ◆ Laboratory and field measurements of coupled processes in fractured/fracturing media
- ◆ Coupled processes relevant in deep mining, including mining induced rockburst
- ◆ Short-term vs. long-term effects

Important Dates

Submission Deadline: **Jul. 15, 2020**

Publication Deadline: **Sep. 15, 2020**

Join as Guest Editor

For scholars who have intention to join the special issue as guest editor, please check out the link below:
