American Journal of Civil Engineering (http://www.journalofcivileng.org) is really excited to announce the new special issue Computational Methods in Geotechnical Engineering (http://journalofcivileng.org/sinfo/229023). This Special Issue represents an effort to capture current developments in Geotechnology. Novel insights as well as fundamental research and analyses around the topics are welcomed. We are eagerly looking forward to seeing various Author’s submissions along with their ingenious works.

Call for Paper

Potential authors are humbly requested to submit an electronic copy of their complete manuscript by http://journalofcivileng.org/submission

| Submission Deadline | Dec. 10, 2019 |
| Publication Deadline | Feb. 10, 2020 |

Topics of Interest include (but not limited to):

- The numerical assessment of the stability of deep excavations and other underground structures
- Numerical modeling and design of retaining structures
- Constitutive modeling and parameter selection of soft soils
- Computational simulation and monitoring in mechanized tunneling
- Optimizing of numerical methods for geotechnical engineering
- Water and food

Join as Guest Editor

For scholars who have intention to join the special issue as guest editor, please check out the link below: http://journalofcivileng.org/jsgt/229023

Current Guest Editors List

1. Yang Chen, School of Resources and Civil Engineering, Shenyang, Liaoning, China
2. Pengjiao Jia, School of Civil and Environmental Engineering, University of New South Wales; School of Resources and Civil Engineering, Northeastern University, Sydney, New South Wales, Australia
3. Xin Xie, Tongji University, Shanghai, China
